THE GAUTHIER ADVANTAGE

Access to Innovation Work with the instrument leader and gain a competitive edge. Gauthier's engineering team tailors new and innovative products to meet your needs, quickly enabling you to fuel your product development pipeline.

Commitment to Value Bring your physicians exclusive innovations by providing them with a uniform, top-of-the line instrumentation set from Gauthier. We never compromise because we're pretty sure your docs won't either.

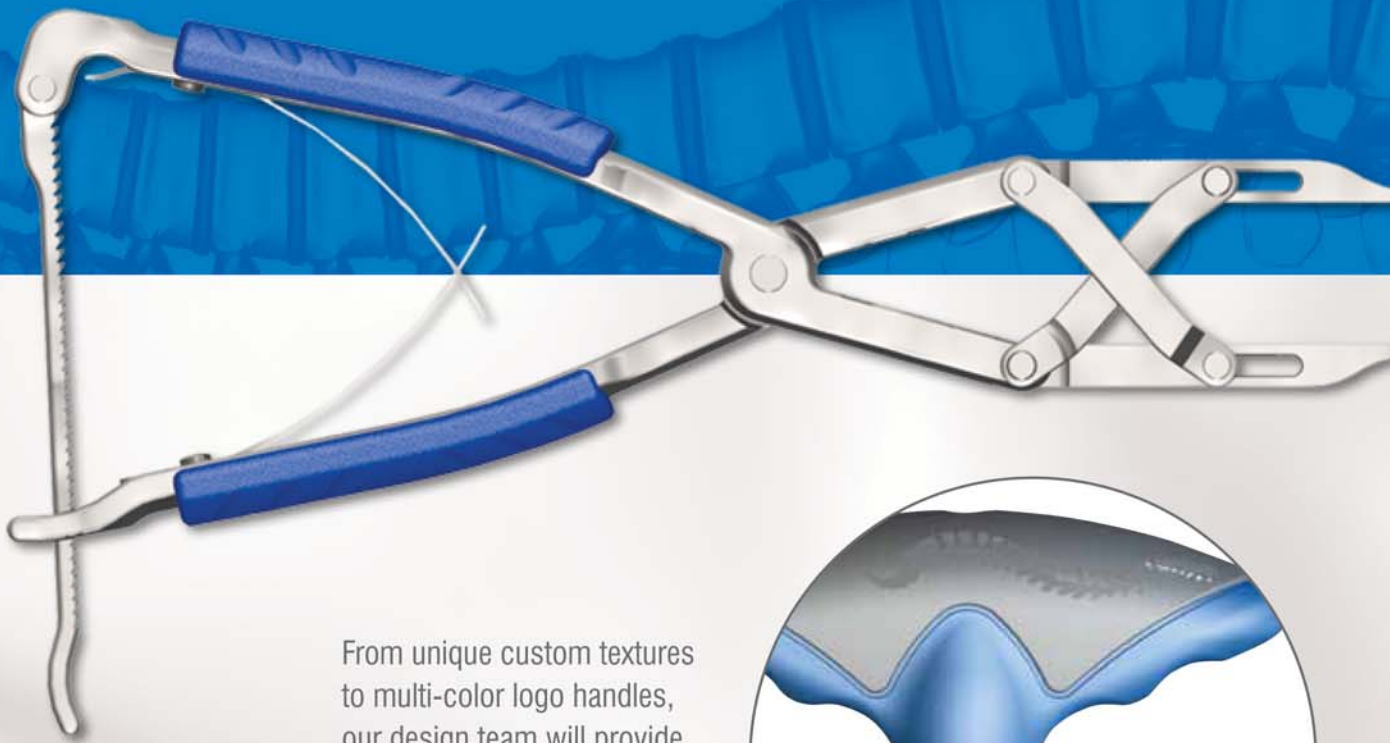

All Manufacturing In House Our goal has always been vertical integration, from molding and machining to assembly and lasermarking. We are dedicated to reducing lead times, reducing cost, controlling quality and streamlining our operations.

Custom Instrumentation

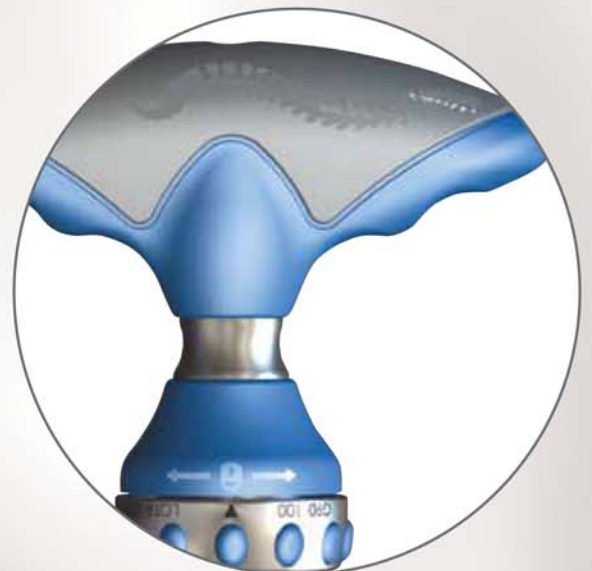

A BRAND ADVANTAGE

Gauthier Biomedical develops one of a kind instrument solutions that enhances your company's unique style.

Distinctive instruments and handles help set your system apart and strengthens your brand identity.

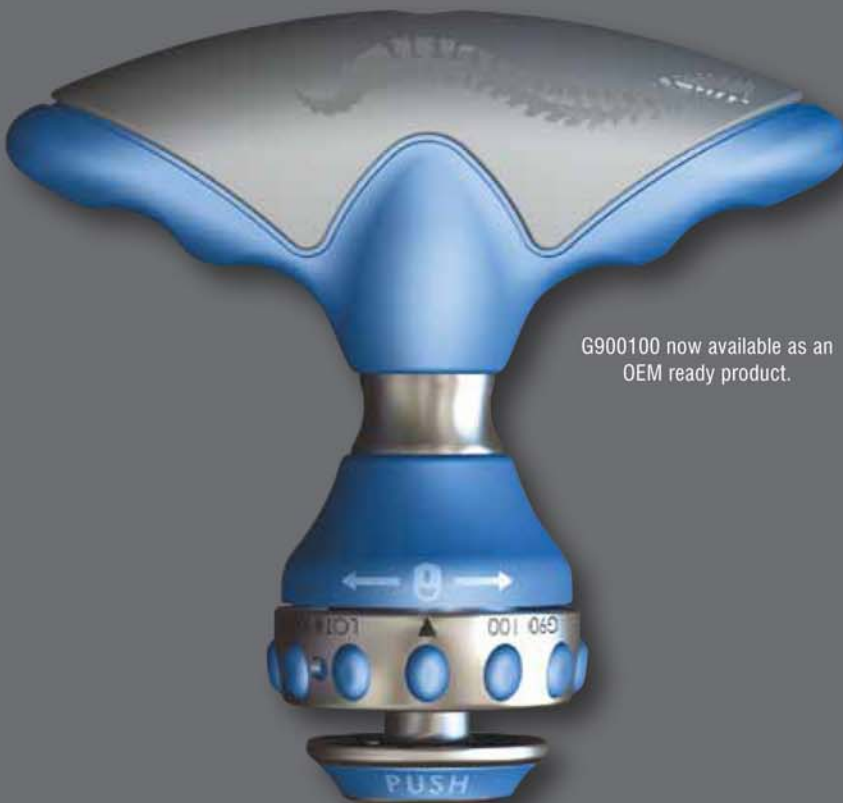

From unique custom textures to multi-color logo handles, our design team will provide jaw dropping options for your next production launch.

SILICONE HANDLE TECHNOLOGY

At the core of Gauthier Biomedical instrumentation is our patent pending silicone molded product capability. We pride ourselves on the innovations that we have brought to the market over the past 10 years including multi-color handles, multi-durometer handles, custom shapes, custom textures, and an unlimited color pallet. Our staff of engineers and designers are available for your project, whether you are modifying one of our standard handles, developing a unique handle for your next product launch, overmolding an existing instrument, or facelifting an entire instrument set. We offer free concepting and prototyping for you to review your next handle. At Gauthier, we design and build our own molds, we compound our own silicone, and we mold ALL of our product in house. This allows us to control costs, save time, ensure quality, and be flexible in the production of the 1000's of handles we produce each month.

One Color

Two Color

Our most popular branding technology allows us to embed custom textures, have raised or recessed logos/text, and provide handles with multiple colors and durometers. These options are rigorously tested to withstand 500 autoclaves without degradation, and will provide years of brand recognition in the market. This is your opportunity to set your company apart from the competition. U.S. Patents Pending.

THREADED HANDLE OPTIONS

Looking for a silicone handle to mate with your instrument? You're in the right place. Gauthier Biomedical offers a number of silicone handle styles with threaded connections to suit your needs. These images provide samples of the Inch and Metric threads we can provide.

COLOR CHARTS

Gauthier Biomedical offers custom silicone molded handles in virtually any color under the sun. Utilizing the Pantone Matching System (PMS), we can provide you with the handle color you need. Use the color chart below to select one of our many standard silicone (or anodize) colors. Identify your handle color by indicating the color code (letter) following the handle part number (eg. G100552_A, where " _A" identifies Blue PMS 285).

What will happen when your customers find out you've been filling their kit with cheap Gauthier knock-offs?

DO YOU **REALLY** WANT TO FIND OUT?

CONTRACT MANUFACTURING

Whether it's improving an existing tool or developing a unique custom instrument, our engineering team will deliver. Our design experience is rooted in biomedical engineering and orthopedics, so you can be sure you're in the most competent hands in the industry. At Gauthier, we encourage you to bring your projects to us, no matter what stage in development. Our decades of experience in the industry means that most likely, we've been there before. It doesn't matter if you're looking for an instrument from our existing product line or need us to build an instrument that absolutely cannot be late for your product launch, you can count on us to deliver every time.

At Gauthier Biomedical, we constantly maintain an ample inventory of instrument components and parts. That means your orders won't miss target dates. If you can't tell by now, we are absolutely fanatical about deadlines. It's a commitment we take seriously. Our goal is to be the most responsive supplier in the country, and we work hard to realize this with every single order. Short turnaround. Last-minute changes. Next-day delivery. If it's possible, we'll work to make it happen.

PROTOTYPING AND SHORT RUN PRODUCTION

At Gauthier Biomedical, we offer a full prototyping service, from a single prototype to clinical builds. You name it, we'll work to make it happen. With our precision machining, fabricating, and finishing services, we can build small quantities of components and instruments. And when you need to increase quantities, we have the manpower to meet your demands. Because our prototypes are built in the same manner that they would be in production, you get a more accurate representation of the final product. And with our short turnaround times and prompt responsiveness to your needs, we know your deadlines will be met.

MOLDED SILICONE HANDLE BLANKS

In some cases, customers need just a handle and nothing else. Gauthier Biomedical offers a variety of handle styles with several means of linking or connecting them to the customer's instrument. For example, a blank handle can be ordered with a threaded end such as a 1/4"-20 UNC-2B threaded connection which mates to a customer's threaded shaft. U.S. Patent Pending. The instrument handle examples shown to the right are listed in bold.

MOLDED SILICONE HANDLES WITH QUICK CONNECT LOCKING ADAPTORS

There are several different connectors in the orthopedic industry but the most typical ones are listed below. Gauthier Biomedical offers many customer specific connectors so anyone can order an instrument from us and know it will work with their system. We offer a number of unique adaptors including our most popular the exclusive Secure Shaft® connector. The instruments shown to the right are listed in bold.

NO-PLAY® RATCHETING SCREWDRIVERS WITH MOLDED SILICONE HANDLES

First to develop and patent the No-Play® technology, today, all Gauthier Biomedical ratcheting screwdrivers are available with our proprietary, all stainless, No-Play® ratcheting mechanism. This original and exclusive design limits axial and side-to-side "play" or "wobble" between the shaft and handle. The result is a smooth, precise and strong ratchet feel. Gauthier Biomedical's No-Play® Ratcheting handles are protected by US Patent numbers 6,817,458; 6,948,605; 7,014,023; 7,156,216; 7,413,065; and other patents pending. The instruments shown to the right are listed in bold.

- Features:
- Ratcheting body is machined into the handle – it is NOT glued into the handle
 - No adhesives or lubricants
 - No axial movement between handle
 - No side-to-side movement
 - All stainless steel construction

- Fully autoclavable
 - Re-useable
 - 36 clicks/per revolution 10 degrees of motion to actuate the mechanism
 - Very low back torque, for small torque applications
 - Allows for very large cannulations

- High torque capacity >250 in-lbs of torque can be applied to this design
 - Dual Bearing Design provides a very smooth and consistent feel
 - Can be configured into any of our handles or custom instruments

TORQUE LIMITING HANDLES

Gauthier Biomedical's torque wrenches are available in an endless combination of handles, connectors, torque values and technologies. The instruments shown to the right are listed in bold.

- Features:**

 - Smoother feel, longer life, more consistent torque, less dependence on lube
 - All Torque Limiting Handles are covered by one or more of the following U.S. Patent Numbers 7,272,998; 7,650,821 and other Patents Pending
 - The torque designs are tested using a combination test of Autoclaving,
- Cooling, Torqueing and re-testing. These tests take a long time but are very rigorous – Typically 150 autoclaves and 6,000 clicks. The test results are more real life than just simply rotating the instrument and taking readings without ever autoclaving

 - Pre-set torque values can be adjusted by Gauthier Biomedical instrument technicians
 - Fully autoclavable
- Sterilizeable
 - Re-useable*
 - Available in a variety of handle options and can be designed to fit nearly any instrument combination
 - High speed torque limiting adaptors for use on power tools
 - All instruments are serial numbered
 - Torque limiting ranges are from 5 in-lbs to 150 in-lbs

*Generally good for 6 months to a year depending on use, Gauthier Biomedical, Inc. can re-calibrate and service the torque limiting wrenches. Accuracy is +/-10-15% at the lowest ranges (10 in-lbs) to +/- 8-10% at the higher values (100+ in-lbs).

RATCHETING TORQUE LIMITERS

RTLs from Gauthier are torque instruments that limit the amount of torque applied when tightening a threaded fastener coupled with the convenience of a ratcheting screwdriver. Our patented RTLs feature Gauthier's market-leading No-Play® ratcheting screwdriver mechanism. Now, with the ability to position their hands for optimal grip using the ratcheting feature, physicians have the ability to tighten and torque constructs with significantly less hand or arm motion. All Ratcheting Torque Limiters are covered by one or more of the following U.S. Patent numbers 7,272,998; 7,430,945; 7,650,821 and other patents pending.

TORQUE LIMITING INLINE ADAPTORS

Gauthier Biomedical produces large quantities of customized torque limiters. Some are built for speed, others are ideal for hand turning. Call today to tell us about your application and we'll find a solution that is just right. U.S. patents pending.

TORQUE LIMITING INLINE ADAPTORS	Part Code
AO Push Female Connect, AO Male Shaft, Non-Cannulated, Inline Torque Adaptor	G207150
AO Push Female Connect, AO Male Shaft, Inline Torque Adaptor	G207151
AO Female Connect, AO Male with Tri-lobe Shaft, Non-Cannulated, Inline Torque Adaptor	G207152
AO Female Connect, AO Male Shaft, Inline Torque Adaptor	G207153
3/16" Sq Lock Female Connect, Stainless T handle, Non-Cannulated, Inline Torque Adaptor	G207750
3/16" Sq Lock Female Connect, Small T handle, Non-Cannulated, Inline Torque Adaptor	G207751

TORQUE MEASURING INSTRUMENTS

Torque measuring instruments do not limit the torque applied. Instead, these devices measure or indicate how much torque is being applied at a given moment. For your specific torque requirements, please contact us for details. U.S. patents pending.

TWIST TORQUE	Part Code
4.5mm Hex Male Shaft, Large T Handle, Twist Torque Indicator	G108278
4.9mm Hex Male Shaft, Large T Handle, Twist Torque Indicator	G108283
0.195" Hex Male Shaft, Large T Handle, Twist Torque Indicator	G108279

1/4" Sq. Lock Connect, 3-Sided Handle, 0-160 inlbs, Ratcheting Deflection Beam Indicator	G121050
1/4" Sq. Lock Connect, 4-Sided Handle, 0-160 inlbs, Ratcheting Deflection Beam Indicator	G121052
Large Hudson Connect, 3-Sided Handle, 0-160 inlbs, Ratcheting Deflection Beam Indicator	G121100

INLINE AXIAL DEFLECTION BEAM	Part Code
1/4" Sq Lock Connect, 4-sided Handle, Inline Axial Defection Beam Torque Indicator	G501100
1/4" Sq Lock Connect, Small T Handle, Inline Axial Defection Beam Torque Indicator	G501200
1/4" Sq Lock Connect, Mini T Handle, Inline Axial Defection Beam Torque Indicator	G501210
1/4" Sq Lock Connect, Male Stryker Shaft, Inline Axial Defection Beam Torque Indicator	G501710

SPEED DRIVERS

Some applications require a tremendous amount of turning, rotating or driving. We get it! That's why we developed the revolutionary speed driver handle. This geared driver is available in many configurations and styles. Call for details. U.S. patents pending.

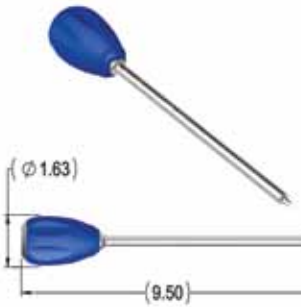

SPEED DRIVER	Part Number
Speed Driver, Veloci-T Handle, 3.5:1-1:1, Ratcheting, Forward-Lock, 1/4" Sq Secure Shaft Connect, Cannulated	G113986
Speed Driver, Veloci-T Handle, 3.5:1-1:1, Ratcheting, Forward-Lock, Torque Limiting, 1/4" Sq Secure Shaft Connect, Cannulated	G113982
Speed Driver, Pistol Handle, 3.5:1-1:1, Ratcheting, Forward-Lock, 1/4" Sq Secure Shaft Connect, Cannulated	G113985
Speed Driver, Pistol Handle, 3.5:1-1:1, Ratcheting, Opposite Dir. Cap, 1/4" Sq Secure Shaft Connect, Cannulated	G113984

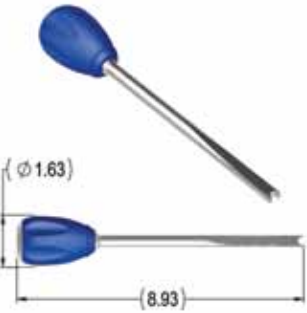

SPINAL INSTRUMENTS

Each OEM's system is unique but one thing is consistent -- Gauthier has the engineering power and machining capabilities to provide precision instruments for any application. Here is just a small sampling of products we offer off-the-shelf. For more information, please contact a customer service representative. The instruments shown to the right are listed in bold.
